

P/N **107526**
Polypropylene Rotary Hand Pump with Micro Matic DV Coupler, 3/4" hose barb discharge.

P/N **107586**
3/4" x 25' hose reel for use with DEF

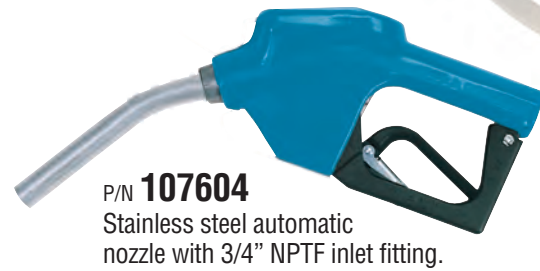

P/N **101090**
Replacement air breather filter element, Baldwin #BT368

P/N **107597**
Polypropylene manual discharge nozzle with 3/4" hose barb connection.

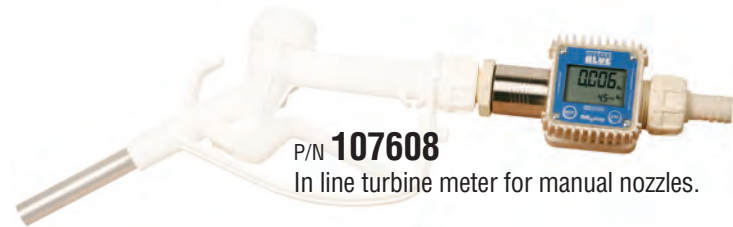

P/N **107594**
One micron DEF filter assembly includes filter housing w/ 3/4" NPTF fittings and one filter element.

P/N **107604**
Stainless steel automatic nozzle with 3/4" NPTF inlet fitting.

P/N **107607**
Replacement filter element, 1 micron, for P/N 701176 housing.

P/N **107608**
In line turbine meter for manual nozzles.

P/N **107589**
115 VAC, 8 GPM self priming pump for use with DEF fluid, has internal bypass with maximum pressure of 22 PSI. Pump is supplied with 3/4" hose barb connections, 6 ft. electrical cable and integrated ON/OFF switch.

P/N **107609**
In line turbine meter for automatic nozzles.

P/N **107610**
3/4" x 12' DEF hose, rigid fitting both ends.

P/N **107613**
3/4" x 16' DEF hose, rigid fitting both ends.

P/N **107614**
3/4" x 20' DEF hose, rigid fitting both ends.

DEF Closed Systems for Purity

Prevent Problems in Your Investment by Ensuring the DEF You Buy has Been Manufactured under the Strictest Quality Specifications. It doesn't stop there; your storage system and the care in which your vendor handles the product are just as important. Here's how Hampel is different.

Product Quality

- Hampel sells only TerraCair® Ultra-Pure Diesel Exhaust Fluid (DEF); the purest in the industry
- TerraCair® Ultra-Pure DEF is the only formaldehyde free formula available
- TerraCair® Ultra Pure DEF prolongs catalyst life and reduces maintenance costs
- Hampel Oil is committed to providing superior equipment that will maintain the purity of TerraCair® Ultra-Pure DEF

Equipment Quality

- The purest DEF requires the cleanest storage and handling equipment
 - Hampel provides only the highest quality equipment to protect your DEF
 - Closed systems utilize multiple features to reduce the possibility of contamination
 - The air entering the system is filtered
 - Container openings are sealed preventing contaminants from entering the system.
 - All materials used in the system are compatible with DEF
 - All pumping equipment receives a deionized water flush before entering DEF service.
- These features along with our ISO 22241 compliant storage, handling and equipment assembly process provide the highest level of product purity available

Note: IBC Tote Tank not included

P/N **107546**
Economical 330 Gallon IBC Tote System for DEF is designed to maintain DEF purity while allowing easy fluid dispensing. All tank access points are secured with tamper evident seals to ensure product integrity. System includes:

- Tote mounting plate w/mounting hardware
- One micron DEF filter assembly with mounting bracket
- 115 VAC, 8 GPM self priming pump
- 3/4" x 16' DEF compatible hose
- Stainless steel automatic nozzle
- Nozzle holder and drip tray
- Tank breather with air filter
- Stainless steel Micro Matic closure system

P/N **107560**
Extended reach IBC Tote System for DEF is designed to maintain DEF purity while allowing easy fluid dispensing. All tank access points are secured with tamper evident seals to ensure product integrity. System includes:

- 3/4" x 25' Hose Reel
- Tote mounting plate w/mounting hardware
- One micron DEF filter assembly with mounting bracket
- 115 VAC, 8 GPM self priming pump
- Stainless steel automatic nozzle
- Nozzle holder and drip tray
- Tank breather with air filter
- Stainless steel Micro Matic closure system

Note: IBC Tote Tank not included

P/N **107565**

Ultimate reach 330 Gallon IBC Tote System for DEF is designed to maintain DEF purity while allowing easy fluid dispensing. All tank access points are secured with tamper evident seals to ensure product integrity. System includes:

- 3/4" x 50' Hose Reel
- Tote mounting plate w/mounting hardware
- One micron DEF filter assembly with mounting bracket
- 115 VAC, 8 GPM self priming pump
- Stainless steel automatic nozzle
- Nozzle holder and drip tray
- Tank breather with air filter
- Stainless steel Micro Matic closure system

Note: IBC Tote Tank not included

Note: Drum not included

P/N **107566**

55 Gallon drum cart system is designed to maintain DEF product integrity while still allowing easy drum change as necessary. System includes:

- 55 Gallon heavy duty drum cart
- Rotary hand pump with DV coupler
- 3/4" x 12' discharge hose
- One micron DEF filter assembly
- Stainless steel automatic nozzle
- Stainless steel Micro Matic closure system

Note: Drum not included

P/N **107567**

55 Gallon drum cart system is designed to maintain DEF product integrity while still allowing easy drum change as necessary. System includes:

- 55 Gallon heavy duty drum cart
- Rotary hand pump with DV coupler
- 3/4" x 12' discharge hose
- One micron DEF filter assembly
- Polypropylene manual nozzle
- Stainless steel Micro Matic closure system

P/N **107568**

55 Gallon drum cart system is designed to maintain DEF product integrity while still allowing easy drum change as necessary. System includes:

- 55 Gallon heavy duty drum cart
- Rotary hand pump with DV coupler
- 3/4" x 12' discharge hose with SS spout
- One micron DEF filter assembly
- Stainless steel Micro Matic closure system

Note: Drum not included

Note: Drum not included

P/N **107570**

Economy rotary hand pump system without a cart is still designed to maintain product integrity. System includes:

- Rotary hand pump with DV coupler
- 3/4" x 12' discharge hose
- Polypropylene manual nozzle
- One micron DEF filter assembly
- Stainless steel Micro Matic closure system

Note: Drum not included

P/N **107569**

Economy rotary hand pump system without a cart is still designed to maintain product integrity. System includes:

- Rotary hand pump with DV coupler
- 3/4" x 12' discharge hose with SS spout
- One micron DEF filter assembly
- Stainless steel Micro Matic closure system
